Overall Grade

The course will be graded on homework, quizzes, the midterm exam. The final will grade will be adjusted based on the class average.

category	# assignments	# points per	total points
Homework	7	20	140
Midterm Exam	2	40	80
Final Exam	1	60	60

Resubmitting Midterms

The frequent quizzes are designed to give you a regular opportunity to check your understanding of the material. As such, they are meant more as a learning opportunity than an assessment. With this in mind, you will be able to resubmit solutions to problems you missed on the quizzes for 50% of the original credit. **These optional resubmissions are due one week from the day of the exam at the beginning of class time.**

Regrading Exams

If you believe a mistake has been made in our determination of your exam grade, you may request *one* regrade. We will regrade your exam in its entirety, which could result in an overall increase or decrease of your score. If you wish to submit a regrade request, you must submit that to the TA within five days of receiving your graded exam. You must include a cover letter with your resubmission explaining where you believe we erred.
